

2025

COOKWARE BOTTOM TECHNOLOGY

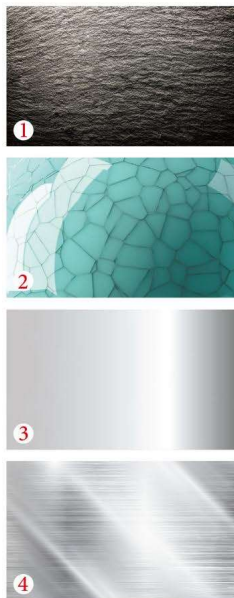

- 1 Impact Bonded Base
- 2 Brazing bottom
- 3 Commercial capsule Base
- 4 5-ply Copper Bonded Base
- 5 Tri-ply clad
- 6 Iron Pad Base

COOKWARE SURFACE TECHNOLOGY

- 1 Matte Color Coating Process**
This coating exhibits excellent resistance to high temperature and is capable of withstanding a boil-dry test up to 10 minutes. Additionally, the coating protects the pot from oxidative erosion, ensuring durability.
- 2 Ceramic color coating process**
Our pots feature a water-soluble ceramic paint that is both safe and non-toxic. This ultra-glossy paint is highly resistant to high temperature and aging, which protects the pot from oxidation and ensures its durability.
- 3 Mirror polishing process**
Brightness is the effect achieved by a series of operations such as polishing on the surface of the pot. It has an effect of improving the gloss of the surface of the pot, making the pot look better and higher.
- 4 Satin Finish process**
Matt is the surface of the pot has a frosted effect. The brightness is not as high as that of bright lights, and you will not feel strong light stimulation.

EST. 2002

WE ARE ZOOMBO

We specialize in stainless steel products with advanced technology, including cookware, pressure cookers, kettles, and Pour Over Kettle

PRESSURE COOKER SERIES

Hot selling items

NOVA PRESSURE COOKER

easy 'Lift-Off' lid

18cm-3L 22cm-4L / 5L / 6L / 7L / 8L

- Stainless steel body with Impact bonded 3.5mm Induction base
- 100KPA high pressure make cooking more efficient and great energy saving
- Multiple security protection design based on safety firstly to protect your family during cooking
- Suitable for all types of stoves, including induction

Pull and lift instantly

execute in one fluid motion, no spinning needed for this

Interchangeable

Versatility & Multi-Functionality-Switch between high and low pressure cooking with interchangeable lids, adapting to different recipes and cooking needs

LOW PRESSURE COOKER

24cm-5QT / 24cm-8QT / 24cm-8QT

- SS body with 3-ply or 5-ply induction heater base
- Low pressure allow us to open lid and add foods any time safety during cooking
- Suitable for all stoves, including induction

COLORFUL COOK ESSENTIAL SERIES

- Glossy imitation ceramics coating on body outside has high temperature resistance
- Ergonomic design valve ensures easy operation
- Aluminum alloy automatic air vent to ensures a safe cooking
- Safety self-relieving window design releases pressure quickly when over pressured

COLORFUL COOK- SMART 4 SERIES

スプリットボー-クアルストープ

- Glossy imitation ceramics coating on body outside has high temperature resistance
- Ergonomic design valve ensures easy operation
- Aluminum alloy automatic air vent to ensures a safe cooking
- Safety self-relieving window design releases pressure quickly when over pressured

VENUS 6 PRESSURE COOKER

- Three-ply composite steel structure at the bottom of the pot which, plump and soft
- 100kpa pressure cooking, circulation long boiling
- One-handed opening and closing operation is simple, three speed pressure regulation cooking

V6-22-B 22CM-6.0L 8.0L

XUAN YI SERIES

XY-22-4L 5L 6L 8L 22CM-4L 5L 6L 8L

- Multifunctional explosion-proof pressure cooker
- 100KPA efficient pressure cooking, saving cooking time
- Impact bottom is heated evenly suitable for a variety of stoves

VENUS PRESSURE COOKER with Easy Lock Lid

- Seven safety protection
- Pressure cooker work on different stoves
- Opening/closing one hand system

COOK-SMART 2&3

- The pressure valve with ergonomic design ensures easy operation with its markings.
- The automatic air vent is designed with anodized aluminum alloy material ensures a safe cooking.
- Safety self-relieving window design releases pressure quickly when the cooker was over-pressured and ensures safety.
